

This website uses its own and third party cookies to improve its services, compile statistical information on the browsing thereof and show you advertising in relation to your preferences, generated based on your browsing patterns. If you continue to browse, you are considered to have accepted the use thereof. To change your settings or for more information, click on "Cookies Policy".

Cookies policy

This portal, like most Internet portals, uses cookies to improve the user's experience. Below you will find information on what "cookies" are, what type of cookies this portal uses, how to deactivate cookies in your browser and how to specifically deactivate the installation of third party cookies.

What are cookies?

Cookies are small files that some platforms, like websites, may install on your computer, smartphone, tablet or connected television. The purpose thereof can be very varied: to store your browsing preferences, compile statistical information, allow certain technical features, etc. Occasionally, cookies are used to store basic information on the browsing habits of the user or their machine, to the point, in some cases, of being able to recognise them.

Why are they important?

Cookies are useful for various reasons. From a technical point of view, they allow websites to be more flexible and adapt to your preferences, like, for example, storing your language or the currency of your country. They also help website managers to improve the services they offer, thanks to the statistical information they collect through them. Finally, they serve to make the advertising we show you more efficient, which means we can offer you services for free.

How do we use cookies?

Browsing in this portal means that the following types of cookies may be installed:

- Performance enhancing cookies

This type of cookie saves your preferences for certain tools or services so you don't have to reconfigure them every time you visit our portal and, in some cases, they may be provided by third parties. Some examples are: audiovisual player volume, preferences for the ordering of items or compatible video playing speeds. In the case of e-commerce, they allow information regarding your basket to be stored.

- Statistical analysis cookies

These are cookies that, whether processed by us or by third parties, allow us to quantify the number of visitors and statistically analyse users' use of our

services. Thanks to them we can study the browsing of our website and thus improve the range of products or services we offer.

- Geolocation cookies

These cookies are used by programmes that try to geographically locate your computer, smartphone, tablet or connected television to offer you the most appropriate content and services in a completely anonymous manner.

- Registration cookies

When you register yourself in our portal, cookies are generated that identify you as a registered user and indicate when you have identified yourself in the portal.

These cookies are used to identify your user account and its associated services. These cookies are kept until you leave your account, close the browser or turn off the device.

These cookies can be used in combination with analytical data to individually identify your preferences in our portal.

- Advertising cookies

These are cookies that, whether processed by us or by third parties, allow us to efficiently manage the advertising spaces on our website, adapting the content of adverts to the content of the requested service or the use you make of our website. Thanks to them we can find out about your internet browsing habits and show you advertising in relation to your browsing profile.

- Other third party cookies

On some of our pages third party cookies may be installed that allow these parties to manage and improve the services they offer. One example of this use is the links to the social networks that allow you to share our content.

- List of third parties that install cookies

- Akamai
- Marfeel
- Google
- Comscore
- 24/7 Media
- Criteo
- Nielsen NetRatings
- Right Media
- SMART AdServer
- Doubleclick
- Facebook
- MediaMind
- Adforma3
- Twitter
- Weborama
- Tradedoubler

How can I set my preferences and revoke my consent to the acceptance of cookies?

You can allow, block or delete the cookies installed on your machine, as well as revoking consent given previously, through the configuration of the options of your internet browser. If you should block them, it is possible that certain services that require the use thereof will not be available to you.

Below we have provided you with links where you'll find information on how to activate your preferences in the main browsers:
